

Name: _____

Date: _____

Ph.D. Course Plan (11/28/2017)
Atmospheric Sciences Graduate Group

Bachelor's Degree: _____
Year Institution Major

Master's Degree: _____
Year Institution Major

A. Breadth Requirement (15-16 units)

An overall "B" grade average or better across all breadth courses is required. A grade of "B" or higher in an equivalent course at another institution may be used towards the breadth requirement, but will not count towards the depth requirement.

Course Title	Course Number	Term and Year	Grade	Comments
Thermodynamics & Cloud Physics	ATM120			Indicate if this course is from another institution
Atmospheric Dynamics I	ATM121a			
Radiation and Satellite Meteor.	ATM128			

And one (1) of the following

Atmospheric Dynamics II	ATM121b			
Meteorological Instru. and Obs.	ATM124			
Biometeorology	ATM133			
Boundary-Layer Meteorology	ATM158			
Introduction to Atm. Chemistry	ATM160			

B. Depth Requirement (36 units)

Courses taken to satisfy the Breadth Requirement may not be used to satisfy the Depth Requirement. At least 6 units of graded ATM graduate courses with a "B" grade average or better. At least 9 units of additional graded upper division or graduate courses. Relevant courses from prior graduate study may be used to satisfy these requirements if they were not counted towards a prior degree. Courses that fulfill any of the program course requirements may not be taken S/U unless the course is normally graded S/U.

Course Title	Course Number	Term and Year	Grade	Units	Comments
Total (36 units required)					

C. Seminar Requirement (4 units)

Four units of ATM290 or equivalent:

Term and Year				
Course Number				

Two seminar presentations: (ATM290 or Exit Seminar)

Term and Year		
Course Number
